This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1908 edition.

Excerpt: .only 80 per cent of this child mortality as being due to preventable diseases. These preventable diseases prove to be not diseases at all, but merely disorders of digestion. The patient would generally recover in twentyfour to forty-eight hours if the one or two errors of diet were corrected. Not all the victims of these digestive disorders die. To make a conservative guess, I should say that the number of new cases of illness each month is at least three times the number of deaths. The former in California would be 480. We may say there are 500 new cases every month of children under five years of age who get sick from these functional disorders; 160 die, some recover; a very large percentage do not recover, but continue to have trouble with stomach or bowel, with resulting defects of development of body and...
