Reviews

It is great and fantastic. I actually have read and so i am certain that i am going to going to go through once again yet again in the future. I realized this ebook from my dad and i encouraged this book to find out.

THE CHEMISTRY AND PHYSICS OF DYEING: BEING AN ACCOUNT OF THE RELATIONS BETWEEN FIBRES AND DYES, THE FORMATION OF LAKES, AND THE GENERAL REACTIONS OF COLLOIDS, AND THEIR SOLUTION STATE (CLASSIC REPRINT)

Language: English Brand New Book ***** Print on Demand *****.Excerpt from The Chemistry and Physics of Dyeing: Being an Account of the Relations Between Fibres and Dyes, the Formation of Lakes, and the General Reactions of Colloids, and Their Solution State In the present volume an attempt is made to collect and classify the work which has been brought forward to explain the action of dyeing, mordanting and lake formation. The general text-books on dyeing devote little space to this particular side of the question. They deal with the operations of the dye-house, rather than with the principles which seem to govern the actual practice of this branch of industry. It is advisable that the modern dyer should have some knowledge of the general reactions, which give rise to the results obtained in the many processes, involved in the dyeing, and bleaching of textile fibres. Without some such knowledge, it is difficult to appreciate their nature; or be in a position to control their working in a systematic manner. To obtain this under present conditions, it is necessary to make a more, or less, tedious search over the scientific and technical journals of the last thirty years. This same difficulty presents itself to the student, who wishes to engage in research on this interesting, but little understood subject. It is, perhaps, equally difficult for the dyer to obtain information of those branches of physical science, which will possibly give an explanation of many of the mordanting and dyeing operations met with in daily practice.
