American Mathematical Society. Paperback. Book Condition: new. BRAND NEW, Topics in the Homological Theory of Modules Over Commutative Rings, Melvin Hochster, This volume contains expository lectures by Melvin Hochster from the CBMS Regional Conference in Mathematics held at the University of Nebraska, June 1974. The lectures deal mainly with recent developments and still open questions in the homological theory of modules over commutative (usually, Noetherian) rings. A good deal of attention is given to the role 'big' Cohen-Macaulay modules play in clearing up some of the open questions. A modest knowledge of commutative rings and familiarity with (the long exact sequences for) Tor and Ext should suffice as a background for the reader.
