

# First- Fourth Report of the Geological Survey in Kentucky Made During the Years 1854 to 1859 Volume 1

By David Dale Owen

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1856 Excerpt: .Ten feet higher is a brownish-grey earthy limestone ore; and twenty feet higher, or sixty feet above the coal, is the top hill ore, within fifteen or twenty feet of the average height of the ridges in this vicinity. Skimming the tops of higher ridges there is still another variety of ore-- Blue Kidney ore. Locally there is also a Blue Block ore, low down in the hills, lying sometimes above and sometimes below a thin lower bed of coal, making six beds in all between the creek bottoms and the tops of the hills. The Buena Vista furnace (H. Mears Co., ) runs about ten tons of iron in twenty-four hours, when in good blast. A third bed of coal occurs on Williams creek, and in the cut of the Big Sandy and Lexington railroad, covered by ten or fifteen feet of shale, on which...
